

## Getting Started

Geocaching (*pronounced geo-caching*) is a worldwide game of hiding and seeking treasure. A geocacher can place a geocache anywhere in the world, pinpoint its location using GPS technology and then share the geocache's existence and location online. Anyone with a GPS device can then try to locate the geocache.

## Before You Go

We've selected ten (10) geocaches in the immediate Marysville area. These caches are simple and should not require too much time or effort to find. Please note that some caches may involve walking in difficult terrain, poisonous plants, and venomous insects/creatures.

Individuals participating in geocaching do so at their own risk. The Union County Convention & Visitors Bureau, the Union County Chamber of Commerce and its affiliates are not responsible for accidents or injury. Please obey all appropriate laws and exercise extreme caution.

Before you begin, **you must have a portable, hand-held GPS unit** (NOT the type used in automobiles) and have previous geocaching experience. Pack any needed supplies such as water, food, extra clothing, cell phone, and a pen. A map and a compass is recommended.

*For safety, let someone know where you are going, and keep an eye on the weather.*

## Now, Get Out and Play!

- Mark your car as a waypoint to ensure your safe return.
- Be mindful of the environment; please do not leave litter behind.
- Bring friends, family and pets with you!
- Remember that distances can be deceiving.
- Understand that many residents have not heard of geocaching. If warranted, be discrete and mindful of other individuals (mugglers).

## Share Your Experience!

- If you take something from the geocache, leave something in return.
- Replace to geocache exactly as you found it.
- Write about your experience in the geocache logbook if one is provided.
- Register on [www.geocaching.com](http://www.geocaching.com) to place your stories and photos online.

A Walk in the Gate	N 40° 14.178 W 083° 23.272	None Provided

## Special Notice

Due to excessive spring rainfall, many areas around Marysville have experienced minor flooding or high water. As a result, some of the caches listed above may be in areas that remain extremely wet or submerged. It is strongly recommended that you dress appropriately and exercise extreme caution while geocaching.
